

TERRAEARTH

CAPABILITY STATEMENT

COMPANY PROFILE

TerraEarth is a single solution Earthmoving company proudly headquartered in Perth. Our distinct strengths lie in excavation & site preparation, Land clearing & levelling, Land Rehabilitation, Foundations, driveways, trenching & drainage, final trim earthworks, rock breaking, site cleanups including rubbish removal and general earthworks. With a steadfast commitment to precision, safety, and reliability, we serve as a leading Earthmoving & Excavation enterprise, shaping the landscape of progress in our region.

Led by Michael Cullen, who brings over two decades of hands-on experience in the civil construction and earthworks industries. At TerraEarth, we do what we say — no excuses, no shortcuts. With a reputation for integrity and delivering results, we specialise in end-to-end earthmoving solutions, ranging from small residential projects to large-scale commercial, mining and infrastructure projects.

VISION STATEMENT

To be a trusted leader in earthmoving and civil construction, transforming land into lasting value through safe, innovative, and sustainable site solutions.

MISSION STATEMENT

To deliver safe, efficient, and high-quality earthmoving and civil construction services through experienced people, dependable equipment, and a commitment to integrity, sustainability, and exceptional project delivery.

HEALTH, SAFETY & ENVIRONMENT

TerraEarth is committed to maintaining a safe and responsible workplace across every project. Through robust health, safety, and environmental management systems, ongoing training, and a culture of accountability, we promote safe work practices, minimise environmental impacts, and support the wellbeing of our workforce and the communities in which we operate.

CORE CAPABILITIES

Earthmoving & Excavation

TerraEarth delivers a broad range of earthmoving and excavation services, providing the groundwork for successful civil, infrastructure, mining, and development projects. Our experienced team combines skilled operators with modern equipment to complete bulk earthworks, detailed excavation, site cuts and fills, land clearing, trenching and service installation safely, efficiently, and to specification.

Capabilities

- Bulk earthworks
- Detailed excavation
- Site cuts and fills
- Land clearing and vegetation removal
- Trenching and service installation

Civil Construction

TerraEarth provides practical civil construction solutions that support project delivery from initial site preparation through to completion. We work closely with clients to deliver reliable outcomes across road and subdivision works, drainage infrastructure, culvert installation, retaining wall preparation, and site development, with a strong focus on safety, quality, and efficiency.

Capabilities

- Road preparation and maintenance
- Subdivision works
- Drainage and stormwater infrastructure
- Culvert installation
- Retaining wall preparation
- Site preparation and development

WHY CHOOSE TERRAEARTH?

TerraEarth delivers reliable earthmoving and civil construction services backed by practical experience, dependable equipment, and a commitment to getting the job done right.

Proven Experience

With experience across civil, mining, infrastructure, commercial, and residential projects, we bring practical knowledge and a solutions-focused approach to every job.

Safety First

We maintain strong safety systems and a culture of accountability to ensure work is carried out responsibly and in accordance with industry requirements.

Reliable Fleet

Our modern, well-maintained equipment helps maximise productivity and minimise downtime on site.

Quality Outcomes

We take pride in delivering accurate, professional work that meets project requirements and supports long-term performance.

Efficient Delivery

Focused planning, clear communication, and proactive problem-solving help keep projects on track and running smoothly.

Flexible Approach

From small-scale works to large earthmoving packages, we tailor our services to suit each project's needs.

Trusted Relationships

We build lasting partnerships through reliability, transparency, and a commitment to delivering on our promises.

KEY PROJECTS

Residential Development: Successful completion of earthworks, land clearing, and site preparation for numerous residential developments across Perth.

Commercial & Industrial Projects: Site preparation, trenching, and foundation works for several large-scale commercial and infrastructure projects.

Mining Sector: Providing specialised rock breaking and site remediation services for mining infrastructure projects.
